

Telecom Yorkshire Business SDSL

High Speed Internet

E-Mail: Sales@TelecomYorkshire.co.uk

Our SDSL plans have been designed for the most demanding of businesses which require fast connections up and downstream without the expense associated with a leased line.

Telecoms Yorkshire's SDSL services (Symmetric DSL) provide a fast, always-on connection direct to the Internet for maximum speed and availability of web content. Available at speeds up to 2 Mbps they are ideal for businesses that have sophisticated needs, i.e. sending and receiving high volumes of data. All prices are monthly subscription charges **EXCLUDING VAT**. All connections are subject to a 12 month contract.

SDSL 500 10:1

- Maximum 10:1 contention ratio
- Includes Static IP Address
- Dedicated BT line supplied
- 12 Month Contract Applies

8 Static IP Addresses £

16 Static IP Addresses £

A static IP address makes it easier to host a mail server or offer other services on the internet. If you operate with a mobile workforce then the allocation of a fixed IP address makes it a simple task to set up a VPN for your staff to access your network remotely.

Static IP Address charges are on a monthly basis.

Our SDSL are subject to a one off **BT installation charge of £325.00 plus VAT**

Always on connection

SDSL provides you with an always on presence on the Internet, allowing you to use the Internet all day, every day without extra call charges being applied.

Increased Upload Limit

Unlike ADSL, which limits upload speeds to 256Kb/sec, SDSL has the same upload and download speed, greatly improving the productivity of your office network.

Reduced Contention

Network contention means you share your bandwidth with up to 50 other users on home ADSL and 20 on business connections. SDSL has a reduced contention rate or only 10:1.

Unlimited downloads

Unlike some other providers, we do not subject your connection to speed restrictions, or download limits.

Our SDSL are subject to a one off **BT installation charge of £325.00 plus VAT.**
